Select APS™ LB Broth (Animal Free Components)

Catalog #:	340-308-101 500 ml
pH:	6.6-7.1
Store at:	2° to 25°C
Shipped at:	Ambient temperature
Composition:	Soy Hydrolysate 2.5 g/L; Yeast Extract 12.5 g/L; Sodium Chloride 5.0 g/L in Cell Culture Grade Water.

DESCRIPTION

Quality Biological's (QBI) Select APS™ LB Broth is prepared from reagent Grade soy hydrolysate, yeast extract, and sodium chloride using QBI's Cell Culture Grade Water. The final product is sterilized by autoclaving.

APPLICATIONS

Select APS™ LB Broth is manufactured from non animal origin ingredients. This medium is a nutrient-rich formulation designed to outperform the classical animal based formulation.

Select APS™ LB Broth is a molecular genetic medium which will grow *E.coli* to a high cell density. There is no glucose thus preventing acetate build-up in the fermentation of the organism.

QUALITY CONTROL

General

The quality of a product is a combination of careful selection of raw materials, proper manufacturing procedures and diligent monitoring of each step.

Quality Control is used to determine whether each step in the manufacturing process has been properly carried out and the finished product meets or exceeds the standards established for it.

Product Specific Testing

Select APS™ LB Broth is routinely tested to verify it meets product specifications for the following parameters:

- pH
- Osmolality
- Performance Tested

The test results of individual lots Select APS™ LB Broth are available upon request from Technical Services.
