RE: Safety Data Sheet (SDS) New Policy

To whom it may concern:

Under OSHA's Hazard Communication Standard 29 CFR §1910.1200, Safety Data Sheets are required to be provided in order to communicate information about potential health and safety concerns associated with the handling of products that may contain toxic or hazardous substances.

If a Quality Biological product is not a hazardous chemical or does not contain any hazardous chemicals, an SDS is not required and will no longer be provided. Quality Biological will continue providing an SDS for products identified as hazardous chemicals or containing hazardous chemicals.
