Endotoxin-Free Water

Ideal for preparing solutions and reagents for transfection, transformation, cell culture and tissue culture.

Use when producing ultra-low endotoxin buffers and serum-free media.

Suitable when testing under pyrogen-free conditions (LAL testing) is required.

Reliable for rinsing and washing equipment, glassware and plasticware in pyrogen-free conditions.

- Mycoplasma tested
- DNase, RNase and protease tested
- 0.1 µm sterile filtered
- Meets < 0.005 EU/mL endotoxin by USP/BET-compliant Endosafe® nexgen-PTS assay
- Manufactured in an ISO 9001:2015 certified facility
- Storage conditions: 2°C-30°C

This product is for research purposes only. Not for diagnostic use.
