

Quality Biological™

Custom Manufacturing to Your Specifications From Discovery through Commercialization...

Whether you need a few liters of medium, buffer, or custom solution for your research or hundreds of liters for commercialization, we have your solution.

We partner with you to ensure a successful technology transfer from the laboratory bench to a scale-up process within a commercial production environment.

Let us free up your valuable resources by:

- Identifying and validating quality raw material suppliers
- Sourcing cost-effective materials with supply reliability
- Assisting with regulatory compliance

Manufacturing Capabilities

- **Cell Biology Media & Reagents**
- **Molecular Biology Buffers & Reagents**
- **Low Endotoxin Reagents**
- **Serum Free Media Development**
- **Aseptic Fill from 1mL to 20L**
- **Specialized Packaging - Bottling, Vials, Bags, Kit Assembly**
- **OEM/Private Labeling of Proprietary Products**

ISO 9001:2015 Certified Manufacturing Facility with controlled limited access.

Quality Management System (QMS) enforced with extensive quality control (QC) to guarantee the highest product quality and reliability.

Contact us...we're ready to get started on your project.

A Personalized Experience with the Flexibility You Need

We got our start in 1983 manufacturing custom liquid solutions and products for the Life Science industry. Partnering with our customers, we develop their products and scale their manufacturing processes to meet their commercial requirements. We pride ourselves on providing the highest quality products with personalized services and the flexibility you need to to achieve your goals.

Cell Culture Media & Reagents

- Stem Cell/Hematopoietic Products
- Classic, Serum-Free, & Custom Media
- Balanced Salt Solutions
- Biological Buffers
- Cell Dissociation & Lysis Reagents
- Serum
- Freezing Media
- Antibiotics
- Insect Media

Molecular Biology Reagents

- Buffers & Salts
- Bacteriological Media & Additives
- Hybridization & Microarray Buffers
- Water, Endotoxin-Free & Critical Purity Grades
- Bulk Solutions

Products & services provided are for research use or further manufacturing.

Contract Services

- Cell Biology Services
 - Expansion and Cryopreservation
 - Preparation of Conditioned Medium
 - Cell Line Development
- Molecular Biology Services
 - Expansion & Preservation of Transformed *E. coli*
 - Plasmid Purification, Mapping, & Analysis
 - Nucleic Acid Amplification
 - Eukaryotic DNA & RNA Isolation
- Immunology Services
 - Recombinant Protein Purification and Expression
 - Monoclonal Antibody Production
 - Endotoxin Testing
 - Western Blot Analysis
 - ELISA Analysis
