Re: Quality Biological, Inc. Products

Dear Valued Customer,

In the past, Quality Biological, Inc. has supported requests for statements related to their products for Animal Origin and BSE/TSE. This communication is to inform you that as of the date of this letter, Quality Biological, Inc. is no longer able to supply these statements for their products.

Our Quality Department has made this decision for the following reasons:

- Our suppliers are increasingly choosing to no longer provide their customers with this type of lot specific information.
- Products or their components may be procured through a distributor and therefore full visibility is not possible beyond the distributor to the rest of the supply chain.
- It is difficult to validate any animal origin/BSE/TSE statements we receive from our suppliers. For example, it may be ascertainable that a product was produced with synthetic components that are of non-animal origin, but we cannot ascertain that the equipment or facility in which it was produced does not contain animal-based materials which could contaminate the product.

At Quality Biological, Inc. excellence and quality are and always have been our commitment to you. If you have any questions regarding this policy change or require additional assistance, please contact our Technical Service group at TechnicalService@qualitybiological.com.

Sincerely,

Jeanmarie
Curley
